

HPMPS400: Healthcare Project Management: Principles & Strategies

This course explores project management skills and the ability to meet project goals on time and within budget while maintaining quality standards that are increasingly important in today's competitive healthcare environment. Learn the theories, tools, and techniques for successful project management. This course also covers task organization and sequencing; schedule development; critical path method implementation as a management tool; the use of milestone and Gantt charts; the reverse planning method; and cost, performance, and client considerations.

Credit Hours: 3
